ARE  
DYNAMIC.

MEET COLIN

HE'S OUR I.T. SUPPORT MANAGER

AS ANY COMPANY KNOWS, ESPECIALLY ANY TECHNOLOGY COMPANY, YOU NEED A STRONG I.T. DEPARTMENT BEHIND YOU. FROM THE SMALLEST ISSUE TO THE LARGEST PROBLEM, THAT TEAM NEEDS TO BE ON CALL 24/7 TO TROUBLESHOOT TO ENSURE THAT CUSTOMERS NEVER FEEL ANY PAIN.

We are lucky in Dynamic EMS that we've never been hit by any major I.T. issue, but we are prepared, nevertheless. You'd be a fool not to in the advanced technological world we live in.

We've automated a lot of our office procedures and warehouse management systems; therefore, we are always aware that our systems need to be cared for, health checks run, and backups in place should an issue arise.

At Dynamic EMS the I.T. role involves knowing about all aspects of electronics from the software, to hardware, to applications, the team need to be aware of situational analysis, root cause and drive relevant solutions. Often always driving I.T. knowledge through to customers as part of our intelligence transfer program.

No two days are the same, and you need to think on your feet, it can be like the tales of the unexpected.

COLIN JOHNSTON
