DYNAMIC.

MEET RYAN

HE'S OUR OUR QUALITY MANAGER

DYNAMIC EMS HAS BEEN IN THE ELECTRONICS MANUFACTURING SERVICES (EMS) INDUSTRY FOR OVER 60 YEARS AND QUITE SIMPLY, WE WOULDN'T HAVE STOOD THE TEST OF TIME, IF OUR QUALITY STANDARDS WERE NOT EXEMPLARY.

Our Original Equipment Manufacturers trust us with their brand reputation. Failure in the field is not an option in any industry, but as we proudly operate within the high reliability sectors of medical, aviation, and space, we need to have a zero-tolerance policy.

So, how can we guaranteed this?

Well, Quality and Continuous Improvement are engrained into Dynamics EMS culture. It's critical to not only meet and exceed our customers' needs, but we also comply to all regulatory requirements set within our industry and that of our customers', which vary from segment to segment, across the globe. Regardless of customer type, size, and scale, ensuring products are consistently manufactured to the same high standard is fundamental to sustain the partnerships we have formed.

As Quality Manager, I ensure that our Quality Team understand that communication is key, and if we spot a production problem, we will proactively discuss our proposed solution with our customer in real-time to avoid down-time.

WE
ARE
DYNAMIC.

MEET RYAN

HE'S OUR OUR QUALITY MANAGER

I am a real data driven decision maker, which is why we harness the power of various statistical and analytical tools for the monitoring and actioning of production test data, giving customers peace of mind that their product is being manufactured efficiently and effectively. And customers like the reassurance. sometimes things don't always go to plan, but there is no need to worry, we have internal procedures for dealing with non-conforming materials, return materials authorisation (RMA), ESD, etc. making us a completely traceable and transparent manufacturing partner.

Dynamic EMS are proudly certified to ISO:9001, ISO:13485, ISO:14001. These accreditations show the commitments Dynamic EMS are making to continually improve the quality throughout the entire business.
